

# DANISH RAZA

## MERN Stack Developer

danishrazabangash@gmail.com | +92 346 8881475 | danishraza.dev | linkedin.com/in/danish-raza-bangash  
| github.com/danishrazabangash | Peshawar, Pakistan

## PROFILE

I'm a final-year Computer Science student at the University of Peshawar, with a focus on full-stack MERN development and practical AI integration. Over the past year I've built and deployed two products on my own — BotForge, a no-code AI chatbot platform, and Footalyzer, an AI-powered football companion app covering major leagues like the Premier League and Champions League — handling everything from the backend architecture to the AI features that power them. I enjoy taking an idea from a blank file to something people actually use, and I'm now looking to bring that same hands-on approach to a product-focused startup or AI team.

## EDUCATION

### Bachelor of Science in Computer Science — University of Peshawar (2026)

GPA: 3.9 / 4.0 · Peshawar, Pakistan

## TECHNICAL SKILLS

|           |                                                                                                     |
|-----------|-----------------------------------------------------------------------------------------------------|
| Frontend  | React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Material-UI |
| Backend   | Node.js, Express.js, RESTful APIs, JWT Authentication, WebSockets (Socket.io)                       |
| Database  | MongoDB, Mongoose, MySQL, PostgreSQL                                                                |
| AI / ML   | Gemini API (embeddings + generation), OpenAI API, LangChain, RAG pipelines, Vector Search           |
| Tools     | Git, GitHub, Docker, Postman, VS Code, npm                                                          |
| Practices | Agile/Scrum, UI/UX, Responsive Design, Web Performance Optimisation, Jest, Mocha                    |

## PROJECTS

### BotForge — AI-Powered No-Code Chatbot Builder

botforge.danishraza.dev

React.js · Node.js · Express.js · MongoDB · Gemini API

- Designed and built a full-stack no-code platform enabling businesses to create, train, and deploy AI chatbots without writing code; supports embeddable widgets for any website.
- Engineered a **four-tier parallel RAG pipeline** using `Promise.all` — combining semantic cosine similarity search (Gemini `gemini-embedding-2`, 3072-dimensional vectors), MongoDB full-text search, regex keyword matching, and fuzzy per-word matching with weighted score merging — achieving **zero hallucinations** at **~780 ms** retrieval latency.
- Built comprehensive analytics dashboards, conversation history tracking, chatbot configuration panels, and a multi-tier subscription model (Free, Pro, and Business).

### Footalyzer — AI-Powered Football Companion App

footalyzer.danishraza.dev

Next.js 14 · Express.js · MongoDB · Redis (Upstash) · BullMQ · Socket.io · Clerk · Stripe

- Built and deployed a full-stack football companion platform delivering AI-generated match briefings alongside live scores and real-time match data across major competitions, including the Premier League and Champions League.
- Designed a Node.js/Express backend with MongoDB and Redis (Upstash), using BullMQ for background job processing and Socket.io for real-time score and event updates.
- Integrated Clerk authentication and a Stripe-powered tiered subscription model, taking the product from concept to a live, monetised deployment.

### Event Booking Platform with Role-Based Dashboards

React.js · Node.js · Express.js · MongoDB · Cloudinary

- Built a full-stack ticketing and event management platform with role-based access control for admins, organisers, and attendees.
- Implemented QR-code ticket verification, Cloudinary image uploads, and responsive dashboards tailored to each user role.

## CERTIFICATIONS & ACHIEVEMENTS

- 98th Percentile** — HEC National Skill Competency Test (NSCT), Pakistan (2026)
- Full Stack Web Development — Angela Yu / Udemy (2025)
- Google Agile Essentials – Coursera (2025)
- Google Introduction to AI – Coursera (2025)
- Google Frontend Development Bootcamp — Google (2023)
